

**RISK ASSESSMENT AND OUTCOME ANALYSIS**  
(\_\_\_\_\_, 2022)

Claims	Key Factual Issues	Key Legal Issues	Damages	Interest etc.	Estimated Total Liability/Recovery	Probability of Prevailing	Risk Weighted Outcome	Attorney Fees	Intangibles and Other Considerations
									<ul style="list-style-type: none"> <li>• Business impacts</li> <li>• Reputation impacts</li> <li>• Regulatory impacts</li> <li>• Litigation demands on company mgmt resources</li> </ul>

**1 This summary is not intended to predict litigation outcomes. It is intended to present hypotheticals solely for purposes of assisting in assessing the risk presented by this case. The dollar estimates are based on discussions with trial counsel and are rough estimates. The outcome risk assessments are placeholder values intended to encourage a discussion of trial risks. Resolution Strategies defers to trial counsel on outcome probability assessments as trial counsel is in the best position to make such assessments. Trial counsel's and RSLLP outcome probability assessments are educated estimates, at best, and do not predict or guarantee a particular outcome will occur. Resolution Strategies suggests case evaluations be periodically reviewed to take into account case developments.**

**2 Intangible factors can play a role in both the risk assessment and settlement decisions. With respect to settlement considerations, reputational interests and business impacts can be material depending upon the circumstances. RSLLP always recommends that clients take a broad view of the risk environment in coming to a settlement decision and related resolution strategy.**
